L.I.U.F.O.N. NEWS.

***** As this newsletter goes to press Channel 12 News here on the Island will be releasing a major story concerning the Network and its investigations. At the recent membership meeting on March 22nd, at the South Country Library, a news crew under the supervision of anchorman Alan Orin interviewed members, witnesses and guests during the meeting. The meeting which was attended by some forty members and guests was also partially video taped during its session. ***** This was only part of the extensive programing that channel 12 news planned for the story on L.I.U.F.O.N.. Earlier in the month, Alan Orin and his news team interviewed John Ford, Grace Columbo, Frank Columbo and Kay Ford concerning the Moriches Bay Case and other significant developments.***** During the development of the story on L.I.U.F.O.N.. it was decided to release a substantial amount of photographs and other research material to help facilitate the story. Some of this material has yet to be made public. ***** The abduction story of James LeFante was also given particular attention with an in depth interview of James reciting his life long adventures with extra-terrestrials. **** Members, pay attention to the forthcoming broadcasts on Channel 12, especially if you attended the last meeting, since you may get a chance to see yourself on T.V.. This story will be the first major media coverage of the Moriches Bay Incident and is certainly going to generate a lot of interest in the organization and its findings. **** Bob Barry's "E.T. Monitor" from Red Lion Pennsylvania plans to do a major story shortly on the Moriches Bay Incident on his nationally telecast Cable T.V. Show. This should be sometime in April and can be seen at 11:00 P.M. on Lifeline Cable here on the Island on Saturdays. Check your Cable Guide for listings. ***** The recent New Jersey State Convention of the Mutual U.F.O. Network saw James Lefante in attendance addressing the gathering with his abduction story and from all indications he was very well received. James has developed his own slide lecture program and is willing to tell anyone of his story. If there are people out there who would like to have James address their civic group or social gathering, please have them contact the Network and we will have James get in touch with you. ***** The recent talk at the Nesconset Public Library was received by a standing room only audience which kept L.I.U.F.O.N. Chairman John Ford and James LeFante some two hours past their scheduled ending time. The audience wanted to hear more and more of what is going on in U.F.O. research. In all the talk was a success. ***** Next scheduled L.I.U.F.O.N. talk is at the Southold Indian Museum on April 21st, 1991 at 2:00 P.M.. ***** The next scheduled Library talk is set for the Lindenhurst Library on Saturday July 20th, 1991. The time is scheduled for 1:00 P.M. to 4:30 P.M. ***** Plans are being made for the next L.I.U.F.O.N. Conference. The target date is scheduled for April 1992. The plans as they stand now are not to hold the next Conference at the Artist Lake Community Center. L.I.U.F.O.N. will be looking for more centrally located conference sites adjacent to the Long Island Expressway for more accesibility. L.I.U.F.O.N. will be checking sites at several hotels in the months to come. ***** L.I.U.F.O.N. will be expanding in the months to come. The Florida chapter is starting to get organized under the supervision of Kelly Firedman and he plans a vigorous membership recruitment program in the months to come. **** Several members have joined this month from out of state and there are currently requests from several of these members to become investigators with the organization. If accepted, these new investigators will enable L.I.U.F.O.N. to conduct investigations outside the metropolitan area in a more organized manner. ***** 30.

MEMBERSHIP CORNER.

MEMBERSHIP MEETING: The last membership meeting was held on March 22nd in the South Country Library in Bellport Village. Due to last month's late publication of the newsletter, February's issue announced the forthcoming meeting, rather than this month's issue which according to our production schedule would be published after the meeting date.

In an effort to keep all members aware of the dates of the next three monthly meetings they are being announced ahead of time in this issue.

Those dates are;

APRIL 26th, 1991: Starting at 6:30 P.M. at the South Country Library in Bellport Village a presentation of video footage dealing with reported Canadian U.F.O. activity. The second part of the meeting will be an hour long video dealing with the Billy Meir Case which was investigated in the 1970's by Wendel Stevens.

MAY 31st, 1991: Starting at 6:30 P.M. at the South Country Library in Bellport Village, a video presentation dealing with the Billy Meir Case. This second video will deal with some more of the startling evidence surrounding this fascinating case. Fraud or the real thing, judge for yourself when you watch this presentation.

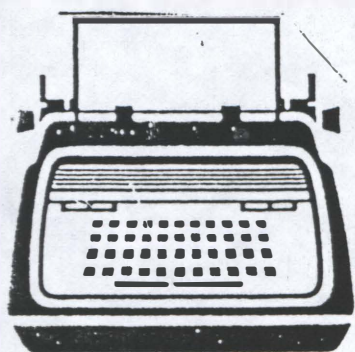

JUNE 28th, 1991: Starting at 6:30 P.M. at the South Country Library in Bellport Village, a video presentation will be aired dealing with the final segment of the Billy Meir Case. A discussion will follow dealing with the pros and cons of the case.

All meetings are open to the public, our members and their guests. There is no smoking in the meeting room and all meetings will start sharply at the stated time. Please attend.

OPERATION LONG ISLAND SKYWATCH: The month of April signals the resumption of operation Long Island Skywatch. This is a three year old program launched by the Network in an effort to obtain photographic evidence of U.F.O. Sightings on Long Island. Each weekend, L.I.U.F.O.N. will be sending members out to assist in the effort to photograph U.F.O. activity in areas of known high activity. Teams assemble each Saturday night and will be sent to areas of high activity. Locations will vary and members will be asked to work under the direction of our investigators. Please call the Hotline for information on the starting date for the resumption of the operation. Please note ! This activity is open only to L.I.U.F.O.N. Members.

ATTENTION MEMBERS: If your membership is about to expire please save us the cost of sending you a renewal letter and mail in your dues for the coming year. Several members have recently done this and as a result have not suffered a interruption in their membership services.

U.F.O. ACTIVITY: Members, remember to report all U.F.O. activity in your area to the Network by either the Hotline or the mailing address. If you should see a newspaper article or magazine clipping on the subject of recent sightings, please forward it to us and you will receive credit for the report in the newsletter.

THE CHAIRMAN'S CORNER.

BY JOHN FORD.

THE LEGACY OF WYTHVILLE.

The recent issue of that excellent periodical, "UFO MAGAZINE", contained an excellent article by co-editor Don Ecker on the aftermath and tragedy associated with the Wythville, Virginia UFO Flap of recent years. The tragedy centers on the courageous efforts of local radio station WYVE Newsman Dan Gordon in investigating the UFO Flap that occurred there beginning in the year of 1988 up until now.

Those of you who do not get, "UFO MAGAZINE", and have not seen the article, we'll try and condensed it into this short report.

Beginning in February of 1988, this small town in Virginia was deluged with over five thousand UFO sightings. The object ranged from discs to boomerangs. The local Air Force Base at Langley attempted to explain them away as Air Guard Refueling Operations, even though they did not coincide with any known Air Force operations. Due to lack of MUFON (Mutual U.F.O. Network) field investigators in the area, Dan and a colleague Paul Dellinger began to investigate the occurrences. The local Police were the first ones to report the strange sightings which were followed by many civilian witnesses.

Together, the two unearthed some interesting stories which they published in a small book entitled. "DON'T LOOK UP!", Some of the interesting items discovered were:

- 1) A lot of small and large animals began to disappear in and around Wythville. Some of these animals appeared in a field with surgical incisions and organs missing. The police ruled it the work of predators or coyottes.
- 2) The police at first co-operative began to ridicule sightings and became increasingly distant on the subject.
- 3) On one occasion Gordon and Dellinger with onlookers and a Camera crew from WUSA watched Air Force jets chase a large luminous object across the sky.
- 4) Senator John Warner when asked by Gordon to look into the sightings refused to comment on anything concerning UFO's.
- 5) State Represenatative Rick Boucher was asked to check into the mystery by Gordon only to have him wait for a reply which until now has never been forthcoming.

The tragedy which Don Ecker relates in his story is a personal one. It seems that Dan Gordon has endured a lot of personal suffering from his investigations.. To name briefly some of the things he and his family endured in the past 39 months are IRS Audits, phone taps, surveillance, mail tampering, threats, visits from weirdos and on one occasion his home was ransacked by an alleged UFO witness in an apparent effort to locate negatives to some UFO photos Dan held. In addition, the expenses Dan incurred with his investigations and with publishing a small newsletter added to his family's burden. The last straw happened in August when Dan's 19 year old son was blinded in a mysterious shooting incident which has not netted due to the Police exhaustive investigation any suspects. There is no conclusive evidence to link it to Dan's investigations. It did produce the breaking point. For as of now Dan Gordon is out of researching UFO's and has ceased publishing his newsletter.

The article goes in much greater detail than what I can condense here. I suggest that you get a copy of the latest issue of, "UFO MAGAZINE", and read it for yourself. By the way, I would suggest when you get a copy, take out a subscription to it. It's worth the money.

The sad legacy of Dan Gordon and Wythville, is a lesson to all of us. UFO's are real and the government will do anything to stop investigations into it.

BLOWUP OF CORNER SECTION OF PHOTOGRAPH FROM THE
GLEN COVE N.Y., 1973 WITNESS' PHOTOGRAPH.

THE GLEN COVE PHOTO ANALYSIS CASE REPORT.

CASE NUMBER: 0097-90

DATE: SPRING OR SUMMER 1973

CLASSIFICATION TYPE: CE-1

WITNESS: 15 YEARS OLD

LOCATION: GLEN COVE, N.Y..

AT TIME OF THE INCIDENT.

CASE SUMMARY, ANALYSIS AND CONCLUSION.

In 1973, the witness, a young teenage high school student, was taking an elective course in photography at her school. The course curriculum demanded the students submit photographs done on their own which would then be developed and graded for their format and developing technique. The student who we will call Leslie embarked on a sunny spring afternoon one Sunday to photograph a lake in a municipal park in Glen Cove New York. While there, she used a standard Kodak Instamatic 124 Camera which was quite popular at the time for snapshots.

Selecting the site for her pictures for the assignment she took one still shot of the lake and the tree line surrounding it. It was a clear day and there was nothing in the sky. She does not remember seeing anything in the line of sight of the camera.

Developing the picture she discovered a form in the upper right hand corner which resembled the form of a oval disc shaped object. She wondered what it was and if she by accident had captured a U.F.O.. Unable to contact any person or organization to analyze it, she held onto the photograph all these years in the hope someday to have it analyzed.

In the spring of 1990, she attended the Vanderbilt Planetarium program. There, she learned of the Long Island U.F.O. Network and contacted us by mail with the photograph attached for analysis.

Upon the receipt of the photograph, LIUFON Chairman John Ford contacted the witness and obtained a statement of the facts surrounding the incident from the witness. She proved very co-operative and agreed that LIUFON could conduct the necessary testing on the photograph.

Our resident photographic expert Chris Zamboni conducted the initial examination of the photograph. His examination was done by examining the grain pattern of the picture under a very powerful magnifying glass. His impression was skeptical since the witness had reported in her statement that there were no aircraft or objects in the sky in her line of sight at the time the photograph was taken.

His analysis concluded that the object was one of two things;

- 1) The object was produced by a tear in the negative. (The witness has admitted that she has lost the negative; thus it could not be proven if it was or not.)
- 2) The object was produced by a emulsion defect in the printing of the picture. Chris based his impression on the witness' statement that she did the developing herself as a class project and as a inexperienced student could have made a mistake.

The witness was contacted and informed of the preliminary analysis by Chris Zamboni. She disagreed with it and stated that she was positive she did not damage the negative or mar the print in developing it.

During the fall of 1990, the photograph was sent to Dick Ruhl who is both a careful and meticulous researcher. Dick is known for his professional background as a photographic expert in the field of commercial photography and analysis.

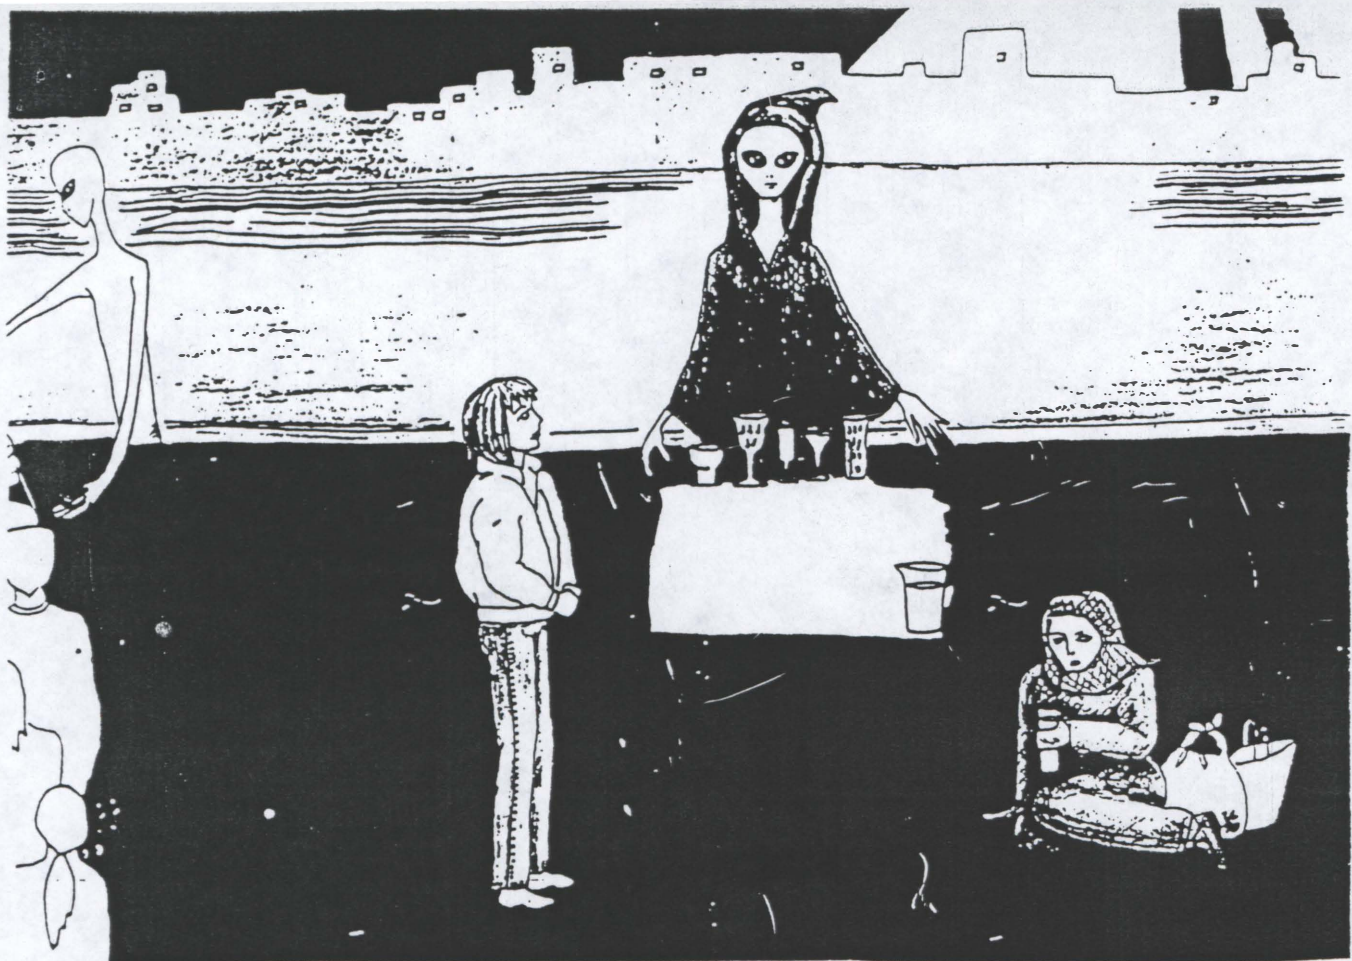

Upon initial examination, Dick did not agree with the report done by Chris Zamboni. The surface of the object showed distinct contrasts and shadows which could only be produced by a three dimensional object. In addition, Dick felt that this object's shape was seen before and quite possibly was photographed in a sighting in the fifties. In either case, Dick felt more extensive analysis was warranted.

Under Dick's expert supervision, the photo was sent to the Loy-Taubman Inc. Photo Lab on East 34th Street in Manhattan for blowup and analysis work. There under professional guidance by Dick Ruhl and his colleagues the picture was carefully analyzed. Several close-ups and blow-ups of the section of the picture containing the unknown were developed. It was then analyzed by Dick.

His conclusions were:

- 1) He felt from the continuous pattern of the grain of the photo emulsion the object was not due to a tear in the negative or from a defect in the emulsion process.
- 2) The object was continuously out of focus indicating it was taken at a distance. This would eliminate any superimposing of a false image on the photograph.
- 3) The object held various hues of grey and black indicating that there were alternating patterns of light on the surface which would lend support that it was three dimensional.
- 4) It was by no means an aircraft of known design.
- 5) Dick feels that the possibility exists that it might be a bird in flight with its wings and head tucked back in flight. He offers this as a POSSIBLE conventional explanation, but not a conclusive one.
- 6) He recommends additional analysis be done by computer in the near future. This would finish the job in his expert opinion.

The arrangements will be made shortly to send the picture to the Fund for U.F.O. Research for computer analysis. The preliminary conclusion right now is that the object is a three dimensional object of unknown origin. It has not been identified and it has not been rule out either as a U.F.O. More tests are required.

THIS IS A DRAWING OF THE CONFRONTATION BY THE WITNESS WITH
HER CAPTORS DOWN AT THE EAST RIVER DURING HER ABDUCTION EXPERIENCE.

MANHATTAN ABDUCTION CASE REPORT.

CASE NUMBER: 0125-90

SUBJECT: ELIZABETH HESS (NOT HER REAL NAME)

TYPE: CE-IV (ABDUCTION)

DATE: LATE SEPT. OR EARLY NOV. 1989

LOCATION: MANHATTAN, W. 37th STREET.

STATUS: STILL UNDER INVESTIGATION

PRELIMINARY CASE SYNOPSIS.

This case has been investigated by the investigative team of Mark Landers and Jeanette Thompson. It involves the reported abduction of a young woman from her apartment building in either late September or early November of 1989. The location was the residential area of West 37th Street in Manhattan.

Mrs. Hess went to bed around 2 A.M. or 3 A.M. on the morning of the night in question. Mrs. Hess has the habit of sleeping in the nude. She and her husband are childless and have separate bedrooms.

After entering her bed and attempting to fall asleep, Mrs. Hess reported a very bright white light entering her bedroom. She lives on the second floor of her apartment building. Elizabeth reported that she observed either three or four creatures entering through the wall of her bedroom and standing by her bed. They commanded her to rise and come with them. She asked if she could get dressed. It annoyed her visitors and they allowed her to put on a ski jacket with her jeans. She left the bedroom barefooted and was soon downstairs standing with her captors on the street.

She stated that there was no verbal communication, but rather telepathic communication. She did not verbalize the communications, but rather felt them.

Once on the street, she observed between thirty and forty other people, mostly woman her age group(Mrs. Hess is 35 years old), walking down W. 37th Street towards the River. She could feel the cold ground under her feet, it had been raining that night and it had stopped. The other people were walking like they were in a trance and were unaware of her. Mrs. Hess reported that she felt a force drawing her towards a building near the river.

ELIZABETH AND HER CAPTORS IN HER BEDROOM WHERE SHE WAS PUNCTURED WITH A GLASS TUBE AND A FATTY WHITE SUBSTANCE WAS REMOVED FROM HER BACK. SUBJECT HAS A PRONOUNCED POCK MARK IN THE LOCATION OF THE ALLEGED PUNCTURE MARK. IT HAS BEEN PHOTOGRAPHED.

She complied with this force and headed towards the river. There at the river, she observed three objects in the sky that resembled the classical "Flying Saucer", with each craft encompassed by bright lights. There was no traffic around and she remembered it being unusually quiet. There was a total absence of any pedestrian traffic also.

A tall thin creature was there which was grouping the people off in groups by the river. The creature in charge was a tall thin female with a black flowing robe with a hood. The creature had no hair and had very big black eyes. She was called forward by this creature and followed her to where a woman "Bag Lady", was sitting. The creature asked her, "This poor woman is thirsty, what are you going to do about it?"

Mrs. Hess said she wanted to give her a drink of water. Nearby on a small table were glasses and pitcher of water. The creature asked her to pick out a glass from the many plain and fancy glasses that were available. Elizabeth picked the biggest and plainest glass and gave the poor woman a glass of water. The creature asked her for the reason behind her choice. She explained to the alien being that she did not want anything to happen to the fancy glass since the poor woman might not appreciate its worth and drop it.

Next thing she recalls is being at the foot of her bed and the beings pulling off her ski jacket. She was trying to struggle, they said they were doctors and they had to give her an injection. Mrs. Hess was very frightened for the needle was very long. She was struggling and the needle went into her right shoulder under the blade. A white substance was extracted out into the needle and the creatures told her it was poison and she should stop smoking and eating chocolates.

L.I.U.P.O.N.

When she awoke the next morning she had a bump and a perfectly round mark on her shoulder blade which was also swollen. Her husband recalls someone telling him to stay in bed that night.

Mrs. Hess recalls the beings in her room being about 5 feet tall with large heads which were wide at the top. The skin was dark blueish, greyish black. Their eyes were large with no pupils. They lacked any ears or hair. They had a very business like facial expression. Their noses were wide and flat. The mouth was wide, throat was thick, and had two arms and legs. Hands held very large, fat fingers with thick nails. The creatures all wore white coats down to their ankles and their feet were bare and wide..

The large 8 feet tall aliens had pasty skin with big heads with pointed chins. Their eyes were big and almond shaped which never blinked. It wore a hooded cloak which was black and she could not see any ears or hair. She doesn't recall any type of nose. Its mouth was tiny and never moved. The body was skinny with long arms and fingers. She could not see any legs. Mrs. Hess felt these beings were familiar and had no feeling of fear or menace.

Mrs. Hess' stereo hasn't worked properly since the experience and her clock radio has not functioned either. She has experienced strange odors in her room, but assumed it was due to air pollution from the street.

In her early childhood around 13/14 years of age, at Christmas one year, she accompanied her mother to a Genovese drug store in Flushing Queens. They entered the store at 7:15 P.M. to pick up a few items. The next thing she remembers it is 11:15 P.M. She and her mother are outside the closed store and have no recollection as to the missing time.

Mrs. Hess has had seven miscarriages in the past four years. Doctors can not find any explanation for these losses. Mrs. Hess has stopped trying to get pregnant. The second to last miscarriage, the doctors could not find a fetus. They proceeded to give her a D,N,C.. The last pregnancy was in August of 1989. She showed signs of spotting and possible miscarriage. She was rushed to New York Hospital where doctors checked her with a sonogram. The tests showed no signs of a fetus in her womb. She was in her third trimester. All the pregnancy tests showed positive. Doctors checked for a possible tubular pregnancy and found nothing. Doctors say Mrs. Hess must have lost the baby before getting the sonogram, but this is not possible since there was no residue, sufficient lost of blood or clotting present. Doctors gave her another D.N.C. and additional tests which showed her to be more pregnant than the day before her admission. The medical tests were all positive. She should have been pregnant and a fetus should have been in her womb.

Mrs. Hess has provided LIUFON with her complete medical history. LIUFON will publicly state that the facts are verified by the medical records. The records have been examined by Jeanette Thompson who is a Registered Nurse with pediatric experience. In her opinion, it is medically impossible.

The question posed by this case and the medical records are terrifyingly real. Are aliens impregnating Human females and taking their cross-breed offspring ? LIUFON has referred Mrs. Hess to Bud Hopkins for hypnotic regression. The medical records are being prepared to be sent to a Doctor for his expert opinion. The case is still under investigation.

LIUFON wishes to thank publicly Mark Landers and Jeanette Thompson for their time and effort in investigating this case. Because of their efforts, it was brought to public attention. Our many thanks to Grace Columbo for preparing the case synopsis which was reprinted here.

THE LONG ISLAND SCENE.

**** The activity continues here on the Island and in the metropolitan area. ***** Recently on March 6th, 1991 the North East was treated to another fireball over the Atlantic States. ***** The Vanderbilt Planetarium and Phil Imbrogno have publicly stated that the object seen by thousands on the night of March 6th into the morning of March 7th was a high altitude flaming meteorite that skipped through the Earth's upper atmosphere. LIUFON does not dispute that report since the characteristics of the object resemble the known parameters of meteors. ***** Clearly on the night of the 6th of March there were other things in the sky. ***** On the morning of March 7th, 1991 two police officers from the Fifth Precinct reported a large luminous object hovering over Moriches Bay at 2:00 A.M. The object lifted up and moved off at great speed. This report was carried by WALK radio from Patchogue on the next day's broadcast of the morning news. The report was not carried in later broadcasts.***** Some three hours before the object was reported over the North East a young waitress in Farmingdale reported a bright oval light descending over the residential area she was parked in. She estimated the object to be between forty to sixty feet across and to have landed in a field near some houses. LIUFON is investigating her report. ***** From Pennsylvania comes a report from one of our members down there that the object was seen over Lancaster. There was not one but two objects. One was obviously a meteor, the second was a boomerang object that followed it. ***** From reports in New Hampshire, it appears this meteor or something stood stationary over the city of Nashua for five minutes then visibly accelerated and disappeared. Its description appeared to be that of a very large red light. ***** It appears that the object was observed to pass close to Manchester New Hampshire and to have landed in the mountains outside that city. Aerial search of the terrain produced no visible impact point for the object. Both Police and civilians reported the object over Nashua in New Hampshire. ***** Question !!! Was something else seen in addition to a meteor ? Answer, there were reports of certainly something else being seen. ***** A report on February 23rd of a close encounter by a light aircraft over Sandy Hook with an extremely large object that came directly towards the pilot and his plane. It was a clear day and the aircraft was flying on a South Easterly course towards South Carolina. The plane was at 10,000 feet and the object was definitely not another aircraft. The pilot contacted the FAA and was told there were no radar contacts near him after the incident. The pilot of the plane refused to file a report with the FAA and this whole incident eventually was reported to us by a confidential FAA contact of Dick Ruhl's. LIUFON is checking this one out. ***** There is a report that was referred to us by Mary Ann Shennelfield from Springfield Mass. The case is that of a observation of three bright amber discs over Feeding Hills in Springfield on March 22nd. The witness is a young machinist who observed the objects while driving his girl friend home that night. ***** The West Islip Abduction Case has been referred to Bud Hopkins for further investigation. ***** This involves a mother and daughter who have reported several abduction scenarios to LIUFON this past year. The activity has been very intense at that location. ***** We have a report in from Patchogue indicating a possible alien encounter from a young father. He awoke on the morning of the 22nd to observe an alien figure outside his bedroom window. He could plainly see its large humanoid head and arms. It was enveloped in a blue-white haze. LIUFON is investigating to determine a possible abduction. There appears that there may be a connection to this family's young child. ***** The activity continues *****

LIUFON

FROM THE ARCHIVES OF THE LONG ISLAND U.F.O. NETWORK INC.

CASE NUMBER: 0014-91

THE COMPLETE PINE BUSH INVESTIGATION REPORT, 2/16/91

TEAM: John Ford, Mark Landers, Peter Kandel, Stewart Kandel,
Donna Stein and Christine Morciglio.

DATE: 2/16/91 , 4:30 P.M.

LOCATION: Waldon, N.Y.,
Jewish Community Cemetary.

Personnel arrived on the scene of the suspected location
of the alien landing zone located in the field behind the
cemetary.

Obsrvations commenced with photographing the area and taking readings with the RF Frequency Meter Detector designed by Mark Landers. There were no appreciable readings given off by the Field Detector. The weather conditions were clear and cold.

DATE: 2/16/91, 9:30 P.M.

Observations commenced with the personnel setting up the monitoring equipment. This consisted of the RF Detector and the Magnetic Field Detector. During the one hour that observations were made the Field Team reported no unusual phenomena. The cemetary was locked and no effort was made to investigate the grounds. The area was photographed by John Ford. The weather conditions were cold and clear with a light cloud cover between 5000 and 10,000 feet reported..

DATE: 2/17/91, 2:30 P.M.

Observations commenced this afternoon with deployment of the RF Detector, the Magnetic Field Detector and Radiation Counter. The area of the cemetary was locked and effort was made to enter to take readings. The area was photographed by John Ford and Mark Landers. No unusual phenomena was detected by the equipment. After one hour the team left the area. A short trip was taken to the area of Sears Road where other suspected landings have been reported over the years. No unusual energy phenomena were reported at those locations. The team returned to the motel.

DATE: 2/17/91, 9:21 P.M..

The field team arrived at the location as indicated above. The team employed cameras, binoculars and various technical equipment.

The team reported from observations made by several of the members a light to the North East of the position which was changing colors. The light was ruled to be definitely not an aircraft of known configurations. It was reported to be changing colors from red, blue, yellow to white. It was at extreme distance at 5 degrees above the horizon. At various times it would be obscured by passing clouds. It was later noted by 10:21 P.M. to have risen to at least 30 degrees above the horizon. It is possible that it could have been a scintilating star. The last observation was made at departure time. It was still changing colors.

During two occasions Mark Landers RF Detector and Magnetic Field Detector were set off with no apparent cause for the signals. It was Mark's opinion that a substantial signal was the source of the RF and Magnetic Field Distortions. It should be noted that one of the disturbances occurred when Chris Morciglio entered and left the parked Cadillac. It could have been caused by the circuitry in the car (later ruled out by subsequent tests).

John Ford attempted to travel up the length of the fencing to enter on one side the field behind the Cemetary. Mr Ford was blocked in his

efforts by barb wire fencing at the rear of the cemetery property.

It should be noted that none of the equipment registered any readings during the afternoon investigations. The only readings obtained were during the evening investigation. Although traffic was very heavy along the County Road during the investigation, none of the traffic disturbed the equipment. Nighttime photographs were taken of the area by John Ford and Chris Morciglio. This was done in hopes of simulating the strange energy fields obtained on many of Ellen Crystal's photographs.

The team also reported frequent readings of low yield radiation on the Radiation Counter. This was unusual since in prior years no radiation was detected at the location, since radiological surveys yielded no discernable background radiation levels in the soil.

The team left the area at 10:33 P.M.

THE NATIONAL AND INTERNATIONAL U.F.O. REVIEW.

MONTREAL, CANADA: It was reported extensively in Canadian newspapers and on local T.V. News that a very large object was reported over this Canadian City on November 7th, 1990. The object was seen by hundreds in the downtown area described a circular formation of yellow or amber lights. The object was stationary for some three hours and was photographed by the Montreal Police. The Canadian Air Force reported no Radar confirmation of the sighting and refused further comment. Witnesses reported the sighting to local Canadian Researchers who have obtained a copy of the photograph from the Montreal Police. The photograph has been ruled by analysis to be genuine. It shows a circular formation of very bright amber lights with noticeable light beams emitting from the object which is partially obscured by a cloud. No explanation has been furnished by authorities for the strange sighting.

FUND FOR U.F.O. RESEARCH, MARYLAND: The Fund has released a recent report indicating its recent fund raising drive was a success. It was able to raise \$10,000 to support the effort to document and interview additional witnesses to the Roswell U.F.O. crash who have surfaced in recent years. Due to their efforts, the Fund was able to support Stanton Friedman, Kevin Randle and Don Schmitt in their costs in interviewing on video tape these additional witnesses. The Fund is making the tape available to the public. The Fund can be contacted at: The Fund for U.F.O. Research, P.O.Box 277, Mount Rainier, Maryland, 20712. The price is \$50.00 per copy.

WENDEL STEVENS, NEVADA: Noted U.F.O. Researcher has issued a statement on the alleged incident in Florence, Italy concerning a video tape of Aliens in a hospital room. The incident involved an injured motorcyclist who was apparently an abductee being visited in his hospital room at night. Wendel Stevens has clarified the incident by stating that no video tape was taken of the encounter. The night nurse apparently entered the room and surprised the visitors by taking a series of 35mm photographs. Wendel has attempted to secure copies of the pictures, but failed when they were purchased by a Italian T.V. Station. The pictures will not be shown on any American T.V. Special later this year as previously reported. No information exists if they will be available to the American U.F.O. Research Community.

NORTH AMERICAN CROP CIRCLE FOUNDATION: This recently form investigative organization has recently issued a full report on North American Crop Circle phenomena. Formed last year to investigate this phenomena, it has reported some 86 circles appearing on the North American Continent last year.
